

MONEY in Australia

Different countries have their own currency, including Australia. In Australia, there are dollars and cents, notes and coins.

There are 6 Australian coins (\$2, \$1, 50c, 20c, 10c, 5c) and 5 Australian notes (\$100, \$50, \$20, \$10, \$5). Also, the shape, size and colour of the currencies are different according to their values, e.g. For coins, only 50c is not circular in shape, for notes, there are 5 colours for each notes.

Furthermore, there are different people, places and animals appearing on the Australian currency. They are representing Australia.
