

Sport

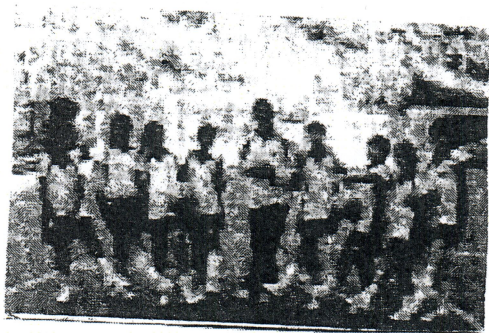

In Australia, the most popular sports are Australian football and cricket. I tried those before. I think Australian football is a exciting sport but cricket is boring. The TV always shows the Australian football matches in Australia.

I love sports. I play different sports, just like: netball, table tennis, ice-skating, basketball Netball is my favourite sport and I am a member of netball team in my school. I had not known about netball before I joined the netball team.

I think netball is a good sport as it is a team sport. We need to cooperate then we could win the competition. Since I joined the netball team, the relationship between

me and teammates become closer and closer. Although I love playing netball, netball in Hong Kong is not popular. In PE lesson, teachers had never taught us about netball. But in Australia, the girls who are students must learn netball and play it. They are so lucky! The

TV also shows netball competitions, Therefore, everyone in Australia know what is netball and it becomes popular in Australia. As this situation, the Australian's technology is better than ours. I hope netball will be popular in Hong Kong and everyone

will know how to play it and like it.
