

All About Animals

I am scared of dogs! In Hong Kong, you are not allowed to have animals in most apartments. However, almost all of the families in Australia have pet dogs.

On the 6th July, I went to the Wildlife Park. In there, I was really satisfied by the zoo. It's because I can feed and touch the kangaroos. Also, I have taken some close-up photo shots with koalas. However, I must keep a distance to any animals in Hong Kong's Ocean Park or any others park. There have many difference of animals between Hong Kong and Australia.

In Australia, there are many special and unique animals. Such as koala, kangaroo, emu, wombat, black swan. If you are in Australia, go to the zoo it is a must! Otherise, you will regret it in your life for sure.
