

My Sharings

Australia is the most beautiful countries that I have never seen. The beautiful ^{is} not only means the whole city view, it also means people who is nice and friendly. It is different to Hong Kong people. You can feel warm and enthusiasm from people.

In the study trip, I have learn the history and the culture of building. Although the trip only in Brisbane, it ^{also} have history building save until today. In Australia, many building is shorter than Hong Kong. you can see the whole sky and building in the distance.

Second, I have learn and see the local animals in the trip. The

local animal, such as Emu, kangaroo and koala, we can ^{close to} see and hug them. It is the most memorable for me in the study trips. We can also feed them if we pay money. All of the Australia animals is lovely and friendly.

Thrid, the local food we can try ^{it} in the study trip. In stance vegemite, tim tams and kangaroo meat. The taste is like Hong Kong some product and food.

Finally, we can feel Australia is different to Hong Kong and it is good place to go. Also, the trip is meaningful and funny to learn different things.
