

### My Sharings

I do enjoy this study tour with my students. Thank you for each party to make this study tour complete. I enjoy Brisbane. I like the way people choose to live. I do see the change of my students. I feel glad I can participate this study tour. The experience I gained will ~~be~~ not be forgotten.

I agree that English is ~~important~~ very important to my students. That is why I feel happy when to see that they tried to work hard and improve. If the class can be better arranged to consolidate what they have learned and have some assessment, it will be better.

Homestay is a good way for my students to experience the cultural differences. Although I am not a English teacher, I feel happy and excited to chat with homestay and experience the improvement of English of my students in this trip.

~ The End ~
