

### My Sharings

Before coming to this trip, I feel a little bit afraid of speaking English with the foreigners. I <sup>was</sup> nervous and read a lot of English language books. After spending some days in Brighton talking with so many foreigners, I think I became more confident in speaking English. I think people in Brighton are very friendly. I've met a lot of nice strangers. An old lady showed me around the park. A man taught me how to play drums in a playground. A man chatted with me in the bus. They are super nice. I will learn from them after back to Hong Kong.

During the study tour, I hurt my leg. I felt really painful

at that time. Everyone showed their care to me and I felt really warm and touching. I hope that I can keep the friendship with other students from different countries. This study tour must be the most unforgettable trip I've ever had in my life.
