

### My Sharings

In this trip, I learnt many history and culture about England. The place where I study is Cambridge Regional College and it is a big and comfortable school. The classrooms are big and wide. In the lessons, we can talk English freely and share our own countries laws or listening to others sharings. I can learn more about Spain and other countries.

Lunch time, the canteen is full of people and there may need to wait for twenty minutes to have lunch. In the evening activities, I went to many places, some of them are churches and some of them are old colleges. The buildings there are full of histories and they are beautiful. The pictures on the glasses of windows are full of colours and they are about the history and the Bibles.

When I got home and stay with the host family, I talk with them. They told me that Cambridge is a place unlike Hong Kong, here is full of grassland and farms. Many famous colleges and schools are here and the weather is not very hot. I play with the children and they are cute. They have a hamster and it enjoy playing with me.

In this trip, I can know more about Cambridge and England.
