### Reflection

\* Please write in English

Before visiting Australia, I was worried about myself. For example, I wondered if I could take a good care of myself, if I could communicate with local people fluently and I would be happy in Australia. After studying for a few days, my worries were disappear gradually. I enjoyed the trip in Australia very much and I love the place.

In the trip, I've learnt a lot of things. For instance, the local animals, culture, sports and history. My horizon was widened. Also, my English was improved as I've learnt a lot of new vocabulary and my grammar was improved. Besides, I've acquired some knowledge from

the conversation between my host family and me. I've known more about the value of an Australian family, their living style and their happiness as an Australian in Cairns.

The most unforgettable places in Cairns was Green Island. I was so enjoyable, and excited when I was walking along its beach. The view was so breathtaking that I didn't want to leave.

It was a precious chance to visit the island which was a little polluted than other countries' beach.

Finally, I was extremely excited and satisfied as I saw the koalas, wallabies, kangaroos, spiders, crocodiles, emus and so on. As the saying goes, travel thousands of miles is better than reading thousands of books. The more you see, the better critical thinking and communication skill you will have. This is the end of my reflection.

Thank You :)
