

My Sharings

Australia, which is located in Southern Hemisphere of the Earth, can be a small continent, but also a massive island. It is separated into six states which are Western Australia, Northern Territory, South Australia, Queensland, New South Wales and Victoria. The climate there is also unique, from equatorial region to temperate region, rainforest to desert, creating their special organisms.

I shared fabulous time with my host family. They are very friendly and also helpful. and I think that they treated me like real family. They hugged me every morning, asked me if I was warm enough, asked me if I needed any help. and blessed me everyday even my friends, teachers and family. They also enjoy the time with their family members, they chatted during dinner time, which different from us, ^{my family} do not chat much. I found the ^{days} in homestay family with happiness.

I had some lessons about Australia and with my study buddy - Jamianna. The lessons were fun and interactive. I found that very different from the lessons in Hong Kong, which ^{would} just teach and ^{do} group discussion. Jamianna and I were having same hobbies as listening to Korean pop and watching Korean dramas, so I had a good topic to chat with her.

Some tourist spots and natural environment in Australia are just fantastic. I went to Dreamworld and had some rides. I found that the Tower of Terror was very exciting and ^{that was} my favorite rides. I also went to Burleigh beach, which ^{was} a stunning beach and people were walking on the fine sand and enjoyed their times in the beach. I watched the sunset there and it was amazing. Also, for the Springbrook rainforest, that was a breath-taking place with many towering green trees and scenic waterfall.
