

My Sharings

During the study tour, I've learnt how to take care of others and discipline myself well. I also learnt how to communicate with German people fluently with English and German. Plus, I discovered more about Germany from my host, teachers and friends, for instance, the culture, habits, history and what they eat, drink, do in daily life etc. which were useful for me to explore

more about the world. Afterwards, I admire the Germans very much that they're kind enough to send a helping hand to others and patient enough to listen to others' difficulties even they couldn't hear clearly and didn't understand what you're saying. Furthermore, I enjoy visiting different famous attractions in Germany and France and this let me eye-opening and earn more travelling experience. Besides, this trip impressed me a lot and taught me many

useful information for applying in daily life, for example, the manner while eating and talking to others etc.

At last, I heart-felt thank to my teachers, who took very good care to us, stayed with us all the time and helped solve ~~problems~~ difficulties actively.

Plus, I want to recommend others to join study tour as this can help them to improve their English and pronunciation. This is also a rare and good chance for others to gain more knowledge and learn self-discipline.
