

My Sharings

On behalf of our school, I would like to show my great gratitude to AEA(ISEC) for organising such a fruitful excursion for ~~teacher~~ our students. Your company shows your experience and professional in organising summer tours. We are very grateful to have Felicity, our group leader, be with us during the trip. She not only always puts students' needs as her first priority, but also she is able to arrange things, from big to small issues, far ahead of the activities. Without her support and

expertise, this trip would have been so much ~~fat~~ fun and successful. My students, without a doubt, regard her as their teacher and friend. In this tour, she has dual roles: being the bridge between school in Liverpool and students, and being a facilitator to propel and make sure all the events go well as stated. In this regard, she has done her job well, and sometimes, it is out of ~~our~~ expectations. For one event, our student twisted his arm, ~~and~~ and Felicity was able to make appropriate judgement in due course, settling the emotions of students, and arranging related check-up. Clearly, she has the ~~prong~~ of quick and effective problem-solving abilities, and she is able to maintain composure and professionalism all the time. I think this is why both students, and teachers like her so much and miss her so much. I also like her to have high expectations on our students, and she even gives students moral lessons when they do wrong. She is a strong asset to your company, and we sincerely hope to work with her again next year. 😊

~ The End ~
