

### My Sharings

I think this trip is great and I know more things about Paris and London through this trip. I enjoy it very much, especially when I'm in the UK because it is similar with Hong Kong in many ways, such as traffic. I also can understand what they are speaking. As for things I learnt, apart from the history behind, I also learnt the citizen's culture while I was shopping or taking public transport. I think time passed so quickly in these few days. But the time was happy and worth remembering.
