

## My Sharings

I will now share the memorable events in this study tour. The most memorable event was <sup>happened when we're</sup> playing sandboard. It suddenly rain and around 80 of us have to hide in a small area. We are all soaked wet and we have to walk bare feet even when we walk on the small rocks and the roads. But we still have fun and we enjoy this extraordinary experience. The second-most memorable event was going to the zoo. Because I always wanted to meet some famous kind of animals in Australia like kangaroos and koalas. I am very excited of meeting them. I've took a picture which I was petting the joey. Her fur were very soft. And I also meet koala bears which are on the tree and they are so cute. I then saw a lot of animals like bats, big birds, turtle, centipede etc.

And I also wanted to thank my buddy for helping through this five days. She bring me to where I've to be, answer my questions about the school, and teach me to do the classwork. And I know that she was working very

hard and have try her best cause she's sick a few days ago. But when she's sick, she still find someone to look after me. That's why I would like to thank her for her hard work. The most interesting lesson I've got is Indonesian. Because we can't learn it in Hong Kong and it is easy to learn. Thus, learning a new language is always good. The most favourite place is Port Stephen (Up to now). Because I enjoy the 'sea ride' although there's no the process of dolphin. And we learn about 'making wines and beers. We also meet a big dog which can run 40 kilometers an hours. When we're playing with the dog, it suddenly rain and the dog's owner and the dog run away and we go look at the souvenirs. I found that things are really expensive in Australia and they are less fully-develop than Hong Kong. Most of all, I enjoy this study tour and this is my first time to be in Australia. I hope I can come here again. Thanks for help from friendly teachers and thoughtful buddy!
